3.10.8 Features and Options (Cont)

The following features are provided where facilities are available:

Anonymous Call Rejection (ACR): Rejects incoming calls that have been marked anonymous, or blocked.

Call Forwarding Automatically routes all incoming local or long distance calls to any number customer specifies (maximum 24 digits). The customer will hear a short ring on the forwarded line each time a call is forwarded as a reminder that this feature is activated. Call Forwarding may ring once before the call is forwarded but the call cannot be answered. The user has control of the activation and deactivation process, but only from the base station where the feature is provisioned. Applied on a per line basis. Cannot be selected with Remote Access Call Forwarding

Call Forwarding Busy Automatically forwards calls to a pre-selected telephone number on a different premise when the called telephone number is busy. Applied on a per line basis. Cannot be selected with Voicemail.

Call Forwarding No Answer Automatically forwards unanswered incoming calls to an alternate TN after a pre-selected number of rings (customer may select between 2 and 7 rings). Cannot be selected with Voicemail. The customer must specify the number to which calls are forwarded and the approximate number of ringing cycles at the time the feature is ordered. Applied on a per line basis.

3. Service Descriptions (Cont'd)

3.10 Residential Service (Cont.)

3.10.8 Features and Options (Cont)

Call Forwarding Busy & No Answer Call Forwarding Busy & No Answer allows the customer to forward calls outside the end-user's switch type. Incoming calls are forwarded to a predetermined Call Forwarding Number. The Call Forwarding Number can be across state lines or outside of LATA boundaries. Call Forwarding Busy & No Answer forwards calls to the same Call Forwarding Number on both a busy line condition and when the telephone is not answered after a predetermined Ringing Cycle. To forward calls to different Call Forwarding Numbers, separate features must be ordered. Applied per line. Cannot be selected with Call Forwarding Busy or Call Forwarding No Answer.

Call Return Enables the customer to dial back the number of the last incoming call whether the call was answered or not. Applied on a per line basis. Cannot be selected with Block Call Return.

Call Screening Provides blocking of fifteen numbers created on a screening list by the customer. Applied on a per line basis.

Repeat Dialing Allows a customer who encounters a busy condition while placing an outgoing call to prompt the central office to redial the telephone number until the call can be completed. Applied on a per line basis. Cannot be selected with Block Repeat Dialing.

Call Waiting: When on a call, Call Waiting alerts the customer with a special tone that another call is waiting. It allows the waiting call to be answered without disconnecting from the existing call. Allows switching between the calls whenever desired. Allows either call to be ended at any time. The customer has the ability to disable and reactivate the feature at will.

Call Waiting ID – Name and Number This service allows a residential customer to control the treatment applied to incoming calls while the customer is off-hook on a call. Call Waiting ID Name and Number includes the functionality of the Call Waiting feature and provides several additional call disposition options. The customer must have a calling identification delivery feature, such as Caller ID-Name and Number, for the calling identification data of the waiting call to be provided following the Call Waiting ID alerting tone Call disposition.

Caller ID-Number Only: This feature enables the customer to view on a display unit the Directory Number of incoming telephone calls. When Caller ID - Number Only is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle with the exception of numbers where the caller is marked "private". The number information is only transmitted when the customer's receiver is on-hook. Calling party number information via Caller ID - Basic is not available on operator handled calls. Utilization of the full capabilities of Caller ID-Number Only requires the use of an Analog Display Services Interface (ADSI) - compatible telephone at the customer's premises. The installation, repair and the technical capability of the ADSI-compatible CPE to function in conjunction with the features specified herein is the responsibility of the customer.

3.10.8 Features and Options (Cont)

Caller ID - Name and Number: This feature allows the customer to view on a display unit the Directory Name and Directory Number on incoming telephone calls. A maximum of 15 characters is allowed for transmission of the calling party name. When Caller ID - Name and Number is activated on a customer's line, the Directory Name and Directory Number on incoming calls will be displayed on the called CPE during the first long silent interval of the ringing cycle. The date and time of the call is also transmitted to the Caller ID - Name and Number customer. Utilization of the full capabilities of Caller ID- Name and Number requires the use of an Analog Display Services Interface (ADSI) - compatible telephone at the customer's premises. The installation, repair and the technical capability of the ADSI-compatible CPE to function in conjunction with the features specified herein is the responsibility of the customer.

Multi-Ring 2 Enables two telephone numbers to share one line. A unique ringing pattern is provided for each of the additional numbers. Applied on a per line basis. One additional ANI must be reserved and specified on the order for Multi-Ring 2. Cannot be selected with Multi-Ring 3, Priority Call Ringing. Customers who subscribe to Multi-Ring 2 are entitled to a listing for each number in the arrangement at no additional monthly charge. This feature is only available to customers of Local Residential Service who were previously subscribed to local residential service offered by Qwest, and who selected the Multi-Ring 2 feature as part of their Qwest local residential service.

Priority Call Ringing: Priority Call Ringing allows an end-user to establish a list of important telephone numbers on a Priority Call List. The Priority Call List can contain up to 15 telephone numbers. When an incoming call is received from a telephone number that appears on the Priority Call List, the end-user will receive a distinctive ring (short, long, short). Incoming calls from telephone numbers on the Priority Call List that encounter a Busy or Don't Answer condition will be treated like any other incoming call; however, the distinctive ring is not forwarded to the remote location. Priority Call Ringing will override Anonymous Call Rejection.

Multi-Ring 3 Enables three telephone numbers to share one line. A unique ringing pattern is provided for each of the additional numbers. Applied on a per line basis. Two additional ANIs must be reserved and specified on the order for Multi-Ring 3. Cannot be selected with Multi-Ring 2, Priority Call Ringing. Customers who subscribe to Multi-Ring 3 are entitled to a listing for each number in the arrangement at no additional monthly charge. This feature is only available to customers of Local Residential Service who were previously subscribed to local residential service offered by Qwest, and who selected the Multi-Ring 3 feature as part of their Qwest local residential service.

Speed Dial- 8: - This provides for the calling of pre-selected telephone numbers by dialing an abbreviated code for up to 8 phone numbers. When the designated code is entered, the telephone number assigned to the code will be dialed.

3. Service Descriptions (Cont'd)

3.10 Residential Service (Cont.)

3.10.8 Features and Options (Cont)

Speed Dial 30 Allows the customer to designate one code for up to 30 telephone numbers. When the designated code is entered, the telephone number will automatically dialed. Applied on a per line basis Cannot be selected with Speed Dial 8.

Three Way Calling: - Allows another party to be added to a call already in progress. The added party may be local or long distance. Toll or local measured service charges will apply to each leg of a Three Way Call.

Call Transfer allows the end user to transfer an incoming call to any dialable telephone number, including a long distance telephone number, and hang-up without disconnecting the call.

CustomNet CustomNet service provides screening options that restrict certain types of outgoing operator assisted toll calls. When end-users dial 0/0, operator services will require charges for the call to be billed collect, to a third party or to a calling card.

Directed Call Pickup¹ Directed Call Pickup with Barge in capability allows a line to pick up an incoming call which is ringing or has already been answered on another line.

Intracall/Home Intercom provides an intercom system on a single line that has multiple telephone sets. When Intracall/Home Intercom is initiated, all telephones on the line ring with a distinctive ring pattern. Any telephone on the line can be used to initiate Intracall/Home Intercom.

Talking Call Waiting¹ an enhancement to Qwest Call Waiting services. It provides an audible announcement of the incoming caller's name. The announcement consists of the regular call waiting tone followed immediately by the calling party's name. On some out of state calls, the end-user may hear the state name followed by the area code where the call has originated. After hearing the new caller's name, the end-user can flash to accept the incoming call or ignore the new call and continue with the original conversation. Must be selected with Call Waiting or Call Waiting ID.

¹ Effective September 25, 2004, this feature will no longer be available to new subscribers.

3.10.9 Pay Per Use Features

Repeat Dialing (*66) Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard. The customer hangs up and a queuing process begins. For the next 30 minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. In some locations, due to technological limitations Repeat Dialing must be purchased with Call Return.

3.11 Small Business Service

- A. Application of Small Business Service: Small Business service is defined as service that is furnished primarily or substantially of a business professional, institutional, or otherwise occupational nature. The Company reserves the right to disconnect customer's Small Business service upon appropriate customer notification if it is determined that usage is not consistent with normal business applications.
- B. Rates and Charges: Usage charges are based on local usage. Chargeable time for the customer shall begin when the called party answers and shall end upon disconnection by either party. Local calls are billed on a per call basis unless otherwise indicated. Calls are rounded to the next higher full minute. If the computed charge includes a fraction of a cent, the fraction is rounded to the nearest whole cent. Per-call calls will be charged according to the rate period the call originates in.
- C. All Small Business service set forth in this Section of this tariff is presently only available to those customers who presently have service on lines with Qwest or with MCImetro or another carrier who provisions service either via resale of Qwest services or via UNE-Platform service provided by Qwest.
- D. The Company reserves the right to discontinue offering the service and grandfather existing customers on one day's notice to the Commission, in the event that 1) facilities are not available to the Company to adequately provide the service, and 2) such lack of facilities is the result of the failure of any carrier (from whom the Company is securing facilities to provide the service) to provide adequate service to the Company.

3.119 Features and Options

The following features are available on customer's primary or additional lines for customers subscribing to Small Business Service on or after August 22, 2003. For customers subscribing to Small Business Service prior to August 22, 2003, the following features only are available: Call Forwarding, Call Waiting, Caller ID-Name and Number, Call Waiting ID-Name and Number, Speed Calling 8, and 3-Way Calling; these features may be included on customer's primary line only.

Anonymous Call Rejection (ACR) Rejects incoming calls that have been marked private or anonymous.

Intercom Service Provides an intercom system on a single line that has multiple telephone sets. When Intercom Service is initiated, all telephones on the line ring with a distinctive ring pattern. Any telephone on the line can be used to initiate Intercom Service.

Call Forwarding Automatically routes incoming calls to a designated answering point, regardless of whether the user's station is idle or busy.

Call Forwarding-Busy Allows the end-user to forward calls outside the end-user's switch type when the called telephone number is busy. Incoming calls are forwarded to a predetermined Call Forwarding Number. The Call Forwarding Number can be across state lines or outside of LATA boundaries, but local or long distance toll charges will apply from the call forwarding number to the forwarded-to number. Cannot be selected with Call Forwarding - Busy & No Answer or Call Forwarding No Answer.

Call Forwarding-No Answer Automatically forwards unanswered incoming calls to an alternate telephone number after a pre-selected number of rings. Incoming calls are forwarded to a predetermined Call Forwarding Number. The Call Forwarding Number can be across state lines or outside of LATA boundaries, but local or long distance toll charges will apply from the call forwarding number to the forwarded-to number. Cannot be selected with Call Forwarding - Busy & No Answer or Call Forwarding Busy.

Call Forwarding-Busy & No Answer Incoming calls may be forwarded to a local or long distance number pre-selected by the customer, but local or long distance toll charges will apply from the call forwarding number to the forwarded-to number. Calls must be forwarded to the same Call Forwarding Number on both a busy line condition and when the telephone is not answered after a predetermined Ringing Cycle. To forward calls to different Call Forwarding Numbers, separate features must be ordered. Cannot be selected with Call Forwarding-Busy or Call Forwarding-No Answer. Applied per line.

3.119 Features and Options (Cont)

Call Return (*69) Enables the customer to dial back the number of the last incoming call whether the call was answered or not. Applied on a per line basis. Cannot be selected with Block Call Return.

Call Screening: This feature provides the customer the ability to prevent incoming calls from up to six different telephone numbers.

Call Transfer Call Transfer allows an end-user to transfer an incoming call to any dialable telephone number, including a long distance telephone number, and to hang up without disconnection the call. Call Transfer also allows an end-user to add a third party to an existing incoming call. Call Waiting and Call Transfer are compatible on the same line; however, only one feature will work at a time. If an end-user has Speed Dial 8 and subscribers to Call Transfer, the list size maximum changes from 8 to 6 numbers. The numbers used will be 2-7. The Call Transfer Number can be across state lines or outside of lata boundaries, but local or long distance toll charges will apply if applicable.

Call Waiting When on a call, Call Waiting alerts the customer with a special tone that another call is waiting. It allows the waiting call to be answered without disconnecting from the existing call. Allows switching between the calls whenever desired. Allows either call to be ended at any time. The customer has the ability to disable and reactivate the feature at will.

Call Waiting ID – Name and Number: When the customer is on the phone and receives another call, Call Waiting ID displays the name and number of the incoming caller. Customers selecting this feature will also receive the Anonymous Call Rejection feature at no additional charge.

Caller ID - Name and Number This feature enables the customer to view on a display unit the Directory Name and Directory Number on incoming telephone calls. A maximum of 15 characters is allowed for transmission of the calling party name. When Caller ID - Name and Number is activated on a customer's line, the Directory Name and Directory Number on incoming calls will be displayed on the called Customer Provided Equipment (CPE) during the first long silent interval of the ringing cycle. The date and time of the call is also transmitted to the Caller ID - Name and Number customer. Caller ID - Name and Number also includes Anonymous Call Rejection (ACR) at no additional charge. Utilization of the full capabilities of Caller ID- Name and Number requires the use of an Analog Display Services Interface (ADSI) - compatible telephone at the customer's premises. The installation, repair and the technical capability of the ADSI-compatible CPE to function in conjunction with the features specified herein is the responsibility of the customer.

Caller ID-Number Only This feature enables the customer to view on a display unit the telephone number of the calling party. Requires display screen, purchased separately by customer from an appropriate vendor. Applied per line. Cannot be selected with Caller ID – Name and Number.

3.119 Features and Options (Cont.)

Customized Call Restriction Provides screening options that restrict certain types of outgoing operator assisted toll calls. When end-users dial 0/0+, operator services will require charges for the call to be billed collect, to a third party or to a calling card. Allows all local and nonchargeable calls, e.g., calls to 800type service numbers and public emergency service numbers such as 911/Enhanced 911 (E911). Calls dialed 0/0+ to Directory Assistance (DA) will be permitted if alternate billing is provided. Must be selected with Block Collect & Third Party Calling.

Directed Call Pickup¹ Allows a line to pick up an incoming call which is ringing or has already been answered on another line.

Multi-Ring 2 Enables two telephone numbers to share one line, in one location, without installing any additional lines. A unique ringing pattern is provided for each of the additional numbers. Cannot be selected with Multi-Ring 3. This feature is only available to customers of local Small Business service who are previously subscribed to local business service offered by Qwest, and who selected the Multi-Ring 2 feature as part of their Qwest local business service.

Multi-Ring 3 Enables three telephone numbers to share one line, in one location, without installing any additional lines. A unique ringing pattern is provided for each of the additional numbers. Cannot be selected with Multi-Ring 2. : This feature is only available to customers of local Small Business service who are previously subscribed to local business service offered by Qwest, and who selected the Multi-Ring 3 feature as part of their Qwest local business

Priority Call Ringing Provides a distinctive ringing pattern (short, long and short), for a Priority Call List containing up to 15 telephone numbers, all of which must be within a Signaling System 7 (SS7) network to be recognized. Incoming calls from telephone numbers on the Priority Call List that encounter a Busy or Don't Answer condition will be treated like any other incoming call; however, the distinctive ringing pattern is not forwarded to the remote location. Applied per line.

Repeat Dialing (*66) Allows auto call back of last outgoing number and keeps trying a busy line until the call can be completed. Applied per line. Cannot be selected with Block Repeat Dialing.

Speed Dial- 8 - This provides for the calling of pre-selected telephone numbers by dialing an abbreviated code for up to 8 phone numbers. When the designated code is entered, the telephone number assigned to the code will be dialed.

Speed Dial 30 - This provides for the calling of pre-selected telephone numbers by dialing a 1- or 2-digit abbreviated code for up to 30 phone numbers. When the designated code is entered, the telephone number assigned to the code will be dialed. Cannot be selected with Speed Dial 8.

¹ Effective October 16, 2004 this feature will no longer be available to new subscribers.

Talking Call Waiting¹ provides an audible announcement of the incoming caller's name. The announcement consists of the regular call waiting tone followed immediately by the calling party's name. On some out of state calls, the end-user may hear the state name followed by the area code where the call has originated. After hearing the new caller's name, the end-user can flash to accept the incoming call or ignore the new call and continue with the original conversation.

Three Way Calling - Allows another party to be added to a call already in progress. The added party may be local or long distance. Toll or local measured service charges will apply to each leg of a Three Way Call.

The following features are available on customer's primary or additional lines at no additional charge:

Hunting-Sequential - Incoming calls are routed to a sequence of telephone numbers ("Hunt Group") on the account when the line reached is busy; the sequence is selected by the customer. Once the incoming call arrives at the last line in the Hunt Group, the line will either ring, provide a busy signal, or be sent to voice mail.

Hunting - Circular: Incoming calls are routed to a sequence of telephone numbers ("Hunt Group") on the account when the line reached is busy; the sequence is selected by the customer. Once the incoming call arrives on a single line of the Hunt Group, if the line is busy, the call will circle back to the line immediately preceding the line on which the call originated in the hunt sequence, which will either ring or provide a busy signal.

Maximum Monthly Charges - The below monthly recurring charges will apply for customers subscribing to Small Business Service on or after August 22, 2003.

Repeat Dialing (*66) Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard. The customer hangs up and a queuing process begins. For the next 30 minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. In some locations, due to technological limitations Repeat Dialing must be purchased with Call Return.

Call Trace (*57) This feature provides a detailed record of the last incoming call, including call-waiting calls. It automatically records the phone number, time, and date of the call. MCI security processes this information and provides it to the appropriate law enforcement agency should customer decide to file a complaint.

Three-Way Calling (*71) Allows another party to be added to a call already in progress. The added party may be local or long distance. Toll or local measured service charges will apply to each leg of a Three Way Call.
