If applicable, in the space below please provide a description for all un-metered water use along with amounts: N/A

Water withdrawn - Total gallons of water withdrawn from pumped sources.
 Water sold - Total gallons from customer meters, and other sales such as construction water.
 Water delivered (sold) to other systems - Total gallons of water delivered to other systems.
 Water received (purchased) from other systems - Total gallons of water purchased/received from other systems.
 Water received (purchased) from other systems - Total gallons of water purchased/received from other systems.
 Water received (purchased) from other systems - Total gallons of water purchased/received from other systems.
 Water received (purchased) from other systems authorized meter do rummetered use Authorized uses such as flushing (mains, services and hydrants) draining/cleaning tanks, process, construction, fire fighting, etc. Non-authorized use (real losses) are service line breaks and leaks, water main breaks, meter inaccuracies and theft.
 Enter the total purchased power costs for the power meters associated with this system.
 Tenter the total purchased kWh used by the power meters associated with this system.

Water Utility Plant Description (Continued)

For the following three items, list the utility owned assets in each category for each system.

TREATMENT EQUIPMENT:	Chlorination
STRUCTURES:	Chlorination Building-Tank 8'x12' - Ft Thomas, Arizona; Chlorination Building-Keen Well 8'x8' - Ft Thomas, Arizona; Booster Pump House 10'x14' - Ft Thomas; Rectifier Building 8'x8' - Ft Thomas
OTHER:	None

Provide a calculation used to determine the value of one water equivalent residential connection (ERC).

Use one of the following methods:

- If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) (a)
- gallons sold by the average number of single family residence customers for the same period and divide the result by 365 If no historical flow data are available, use: (b)
- ERC = (Total SFR gallons sold (Omit 000) / 365 days / 350 gallons per day)

The Pima water system was approved in ACC decision no 78298 dated 11/5/2021 to extend the CCN to take over approximately 279 water meters from the City of Safford known as the "Centra Area". The project includes main line upgrades and a new water storage tank. It is anticipated this project will be completed by 8/1/2022. The Pima water system is also installing a new water main line to the "Riverback" area that is already served by GCEC. This new line which as received approval to construct from ADEQ will be a 12 inch main and will help increase capacity and water pressure in the Riverback area. It is anticipated the Riverback project will also be completed by 8/1/2022.
