TARIFF FORMAT SHEETS

- A. **Sheet Numbering:** Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between pages 11 and 12 would become page 11.1.

- B. **Sheet Revision Numbers:** Revision numbers also appear in the upper right corner of each sheet where applicable. These numbers are used to indicate the most current page version on file with the Commission. For example, a 4th Revised Sheet 13 would cancel a 3rd Revised Sheet 13. Consult the Check Sheet for the sheets currently in effect.

- C. **Paragraph Numbering Sequence:** There are nine (9) levels of paragraph coding. Each level of coding is subservient to its next higher level:
 - 2.
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i)
 - 2.1.1.A.1.(a).I.(i).(1)

- D. **Check Sheets:** When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current Revision Number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (*i.e.*, the format, etc. remains the same except for the revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on file with the Commission.

3.1 Prepaid Calling Card Services (cont'd.)

3.1.2 Description of Service (cont'd.)

3.1.2.1 Prepaid Calling Card Usage

- A. Prepaid Calling Card Service is offered via access numbers printed on the back of the Cards. The Customer dials the access number on the Card and is then prompted by an automated voice response system to enter the Authorization Code (or PIN), which is either included on the back of the Card or otherwise provided to the Customer upon purchase. The Customer then enters the called telephone number. A PIN is not required if the Card provides for ANI registration and the Customer registers its ANI with the Company.
- B. The Calling Card Platform validates the PIN or ANI, determines the time remaining on the Card, which is prompted to the caller, and completes the call.
- C. Billing for a call begins when the Platform receives a signal that the called-to number is answered. Billing ends when the Platform receives a signal that the calling or called party has terminated the call. Upon call termination, the total consumed cost for each call is deducted from the remaining balance on the Card.
- D. Calls are billed in increments ranging from one to five minutes depending on the specific calling Card and the destination called.
- E. All calls must be charged against a Card that has a sufficient balance. All callers will receive a warning tone one (1) minute before the balance is reduced to zero (0). The call will be interrupted when the balance is reduced to zero (0).
- F. Calling Cards are only valid if activated by an authorized distributor or reseller and used prior to their expiration dates. The Company will not refund unused balances after Cards have expired.
