

Applies to all **WATER** service areas
STATEMENT OF CHARGES

In Decision Nos. 73573 (November 21, 2012) and 73993 (July 16, 2013), the Commission approved the following rates and charges **effective July 16, 2013**:

WATER DIVISION RATES

Monthly Minimum Charge (All Classes)

<u>Meter Size</u>	<u>Charge¹</u>
5/8" x 3/4" Meter	\$ 7.39
3/4" Meter	11.09
1" Meter	21.12
1 1/2" Meter	36.96
2" Meter	59.14
3" Meter	137.28
4" Meter	184.80
6" Meter	369.60
Irrigation	180.00

¹ The Commission authorized the Company to implement a monthly surcharge of \$0.33 per customer for the water division, and a surcharge of \$0.33 per customer for the wastewater division. Each surcharge shall remain in place for either: (1) a period of 60 months, or (2) until the division has collected \$200,000 in rate case expense recovery, whichever comes first.

PIMA UTILITY COMPANY**PLAN OF ADMINISTRATION FOR
PURCHASED POWER ADJUSTMENT MECHANISM****I. GENERAL DESCRIPTION.**

This document is the Plan of Administration ("POA") for the Purchased Power Adjustment Mechanism ("PPAM") for Pima Utility Company ("Pima" or "Company") approved by the Arizona Corporation Commission ("Commission") in Decision No. 76540 on January 3, 2018. The PPAM allows Pima to pass through to its customers the increase or decrease in purchased power costs that result from a rate change for any electric service provider supplying retail electric service to the Company.

II. PPAM RELATED FILINGS.

A. Within 60 days of the effective date of a Commission Decision authorizing a rate change in the approved tariffs for any electric service provider supplying retail electric service to the Company, the Company shall file with Docket Control an analysis of the actual impact on the energy portion of the Company's electric service costs.

B. The Company will provide the Commission with spreadsheets detailing exactly how the Company's purchased power expenses were calculated in the time period prior to a change in the rate that the Company must pay for purchased power. These calculations will include basic service charges and rate and volume figures. That is, the Company will break down its total purchased power bill into the amount due to fixed fees, volume of electricity used, and the rates paid per unit of electricity. For the period following the rate change, the Company will provide the same information, then compare the two periods, isolating any change in purchased power cost that is due exclusively to a rate change. The specific intent is to show exactly how much of any increase or decrease is due to changes in rates beyond the Company's control and how much is due to a change in the amount of power that the Company consumes. The Company will only recover increases or refund decreases that are due to changes in rates.

C. All revised schedules filed with the Commission pursuant to the provisions of this PPAM will be accompanied by documentation prepared by the Company in a format approved by Utilities Division Staff of the Commission and will contain sufficient detail to enable the Commission to verify accuracy of the Company's calculations.

D. The surcharges will not become effective until approved by the Commission.

E. The Company will file annually with the Commission a report detailing the Company's purchased power costs and any conservation or power-shifting measures employed by the Company.

F. The Company shall provide notice (in a form acceptable to Staff) of the rate increases to customers with the bill where the rate increase first appears.

III. APPLICATION TO WATER AND SEWER CUSTOMERS.

A. The increase or decrease in purchased power costs that are due to changes in rates at the Company's water and sewer facilities will be allocated on a per capita basis.

B. See the following example:

<i>Test Year</i>			<i>Current Year</i>	
Purchased Power Rate		\$0.0800	Rate	\$0.1000
Kilowatt Hours Used	1,250,000		Kilowatt Hours Used	1,250,000
Purchased Power Expense	\$100,000		Purchased Power Expense	\$125,000

<i>Pass Through Calculation</i>	
Current Year Purchased Power Expense	\$125,000
Test Year Purchased Power Expense	\$100,000
Increase in Purchased Power Expense Due to Rate Increase	\$25,000

<i>PPAM Charge on Sample Customer Bill</i>	
Increase in Purchased Power Expense Due to Rate Increase	\$25,000
Number of Water/Sewer Customers	20,000
PPAM Charge on Sample Customer Bill	\$1.25

PIMA UTILITY COMPANY

**PLAN OF ADMINISTRATION FOR
PROPERTY TAX ADJUSTMENT MECHANISM**

I. GENERAL DESCRIPTION.

This document is the Plan of Administration (“POA”) for the Property Tax Adjustment Mechanism (“PTAM”) for Pima Utility Company (“Pima” or “Company”) approved by the Arizona Corporation Commission (“Commission”) in Decision No. 76540 on January 3, 2018. The PTAM allows Pima to pass through to its customers the increase or decrease in property taxes that results from a change in the applicable assessment ratio and/or property tax rates.

II. PTAM RELATED FILINGS.

A. Within 60 days of the effective date of a change in the assessment ratio and/or property tax rates applicable to the Company, the Company shall file with Docket Control an analysis of the actual impact on the Company’s property tax expenses.

B. The Company will provide the Commission with spreadsheets detailing exactly how the Company’s property tax expenses were calculated in the time period prior to a change in the assessment ratio and/or property tax rate that affects the Company’s property tax expenses. These calculations will include the assessment ratio, the property tax rates, and the value of the property that was taxed. For the period following the change(s), the Company will provide the same information, then compare the two periods, isolating any change in property tax expense that is due exclusively to changes in the assessment ratio and/or property tax rates. The specific intent is to show exactly how much of any increase or decrease in property tax expense is due to changes in the assessment ratio and tax rates beyond the Company’s control and how much is due to changes in the value of the property the Company owns. The Company will only recover increases or refund decreases that are due to changes in the assessment ratio and tax rates.

C. All revised schedules filed with the Commission pursuant to the provisions of this PTAM will be accompanied by documentation prepared by the Company in a format approved by Utilities Division Staff of the Commission and will contain sufficient detail to enable the Commission to verify accuracy of the Company’s calculations.

D. The surcharges will not become effective until approved by the Commission.

E. The Company will file annually with the Commission a report detailing the Company’s property tax expenses.

F. The Company shall provide notice (in a form acceptable to Staff) of the rate increases to customers with the bill where the rate increase first appears.

III. APPLICATION TO WATER AND SEWER CUSTOMERS.

A. The increase or decrease in property tax expenses that are due to changes in the assessment ratio and/or property tax rates at the Company's water and sewer facilities will be allocated on a per capita basis.

B. See the examples on the next page:

Curtailment Plan for Pima Utility Company

ORIGINAL

ADEQ Public Water System No: 07-120

Pima Utility Company ("Company"), is authorized to curtail water service to all customers within its certificated area under the terms and conditions listed in this tariff.

This curtailment plan shall become part of the Arizona Department of Environmental Quality Emergency Operations Plan for the Company.

The Company shall notify its customers of this new tariff as part of its next regularly scheduled billing after the effective date of the tariff or no later than sixty (60) days after the effective date of the tariff.

The Company shall provide a copy of the curtailment tariff to any customer, upon request.

Introduction

Pima Utility Company operates two independent water systems within its certificated area. ADEQ Public Water system Number 07-120 is a potable water system providing service to residential, commercial and irrigation customers. A separate, non-potable water system provides irrigation service to golf courses.

Since the systems operate independently, one system could require curtailment while the other system continues to operate a full capacity. Therefore, a separate curtailment plan is provided for each system.

Potable Water System Curtailment Plan

Pima Utility Company is authorized to curtail water service to all customers within its certificated area connected to its potable water system under the following terms and conditions.

Stage 1 Exists When:

Company is able to maintain water storage in the potable water system at 100 percent of capacity and there are no known problems with its potable well production or potable water storage in the system.

Restrictions: Under Stage 1, the Company is deemed to be operating normally and no curtailment is necessary.

Notice Requirements: Under Stage 1, no notice is necessary.

ADMINISTRATIVELY
APPROVED FOR FILING

ORIGINAL

Stage 2 Exists When:

- a. Company's potable water storage or potable well production has been less than 80 percent of capacity for at least 48 consecutive hours, and
- b. Company has identified issues such as a steadily declining water table, increased draw down threatening pump operations, or poor water production, creating a reasonable belief the Company will be unable to meet anticipated potable water demand on a sustained basis.

Restrictions: Under Stage 2, the Company may request the customers to voluntarily employ water conservation measures to reduce water consumption by approximately 25 percent. Outside watering should be limited to essential water, dividing outside watering on some uniform basis (such as even and odd days) and eliminating outside watering on weekends and holidays.

Notice Requirements: Under Stage 2, the Company is required to notify potable water customers by delivering written notice door to door at each service address, or by United States first class mail to the billing address or, at the Company's option, both. Such notice shall notify the customers of the general nature of the problem and the need to conserve water.

Stage 3 Exists When:

- a. Company's total potable water storage or potable well production has been less than 50 percent of capacity for at least 24 consecutive hours, and
- b. Company has identified issues such as a steadily declining water table, increased draw down threatening pump operations, or poor water production, creating a reasonable belief the Company will be unable to meet anticipated potable water demand on a sustained basis.

Restrictions: Under Stage 3, the Company shall request the customers to voluntarily employ water conservation measures to reduce daily consumption by approximately 50 percent. All outside watering should be eliminated, except livestock, and indoor water conservation techniques should be employed whenever possible. Standpipe service shall be suspended.

Notice Requirements:

1. Company is required to notify potable water customers by delivering written notice to each service address, or by United States first class mail to the billing address or, at the Company's option, both. Such Notice shall notify the customers of the general nature of the problem and the need to conserve water.

ADMINISTRATIVELY
APPROVED FOR FILING

2. Beginning with Stage 3, Company shall post at least ten (10) signs showing the curtailment stage. Signs shall be posted at noticeable locations, like at the well sites and at the entrance to major subdivisions served by the Company.
3. The Company shall notify the Consumer Services Section of the Utilities Division of the Corporation Commission at least 12 hours prior to entering Stage 3.

Once Stage 3 has been reached, the Company must begin to augment the supply of water by either hauling or through an emergency interconnect with an approved water supply in an attempt to maintain the curtailment at a level no higher than Stage 3 until a permanent solution has been implemented.

Stage 4 Exists When:

- a. Company's total potable water storage or potable well production has been less than 25 percent of capacity for at least 12 consecutive hours, and
- b. Company has identified issues such as a steadily declining water table, increased draw down threatening pump operations, or poor water production, creating a reasonable belief the Company will be unable to meet anticipated potable water demand on a sustained basis.

Restrictions: Under Stage 4, the Company shall inform the potable water customers of a **mandatory** restriction to employ water conservation measures to reduce daily consumption. Failure to comply will result in customer disconnection. The following uses of water shall be prohibited:

- Irrigation of outdoor lawns, trees, shrubs, or any plant life is prohibited
- Washing of any vehicle is prohibited
- The use of water for dust control or any outdoor cleaning uses is prohibited
- The use of drip or misting systems of any kind is prohibited
- The filling of any swimming pool, spas, fountains or ornamental pools is prohibited
- The use of construction water is prohibited
- Restaurant patrons shall be served water only upon request
- Any other water intensive activity is prohibited

The Company's operation of its standpipe service is prohibited. The addition of new service lines and meter installations is prohibited.

Notice Requirements:

1. Company is required to notify potable water customers by delivering written notice to each service address, or by United States first class mail to the billing address or, at the Company's option, both. Such notice shall notify the customers of the general nature of the problem and the need to conserve water.

ADMINISTRATIVELY
APPROVED FOR FILING

2. Company shall post at least ten (10) signs showing curtailment stage. Signs shall be posted at noticeable locations, like at the well sites and at the entrance to major subdivisions served by the Company.
3. Company shall notify the Consumer Services Section of the Utilities Division of the Corporation Commission at least 12 hours prior to entering Stage 4.

Once Stage 4 has been reached, the Company must augment the supply of water by hauling or through an emergency interconnect from an approved supply or must otherwise provide emergency drinking water for its customers until a permanent solution has been implemented.

Customers who fail to comply with the above restrictions will be given a written notice to end all outdoor use. Failure to comply within two (2) working days of receipt of the notice will result in temporary loss of service until an agreement can be made to end unauthorized use of outdoor water. To restore service, the customer shall be required to pay all authorized reconnection fees. If a customer believes he/she has been disconnected in error, the customer may contact the Commission's Consumer Services Section at 1-800-222-7000 to initiate an investigation.

Non-potable Water System Curtailment Plan

Pima Utility Company is authorized to curtail water service to all customers within its certificated area connected to its non-potable water system under the following terms and conditions.

Stage 1 Exists When:

Company is able to maintain the non-potable well production at or above the capacity necessary to meet non-potable water demands.

Restrictions: Under Stage 1, Company is deemed to be operating normally and no curtailment is necessary.

Notice Requirements: Under Stage 1, no notice is necessary.

Stage 2 Exists When:

Company's non-potable well production is below the capacity necessary to meet non-potable water demands.

Restrictions: Under Stage 2, the Company may restrict deliveries to non-potable customers to the quantity of water available from the non-potable water system.

Notice Requirements: Under Stage 2, the Company is required to personally contact and meet with the management of each golf course receiving non-potable water service to provide an overview of the general nature of the problem, the expected duration of the problem and the expected level of water restriction.

ORIGINAL

CROSS-CONNECTION OR BACKFLOW TARIFF

PURPOSE:

The purpose of this tariff is to protect Pima Utility Company ("Company") water from the possibility of contamination caused by the backflow of contaminants that may be present on the customer's premises by requiring the installation and periodic testing of backflow-prevention assemblies pursuant to the provisions of the Arizona Administrative Code ("A.A.C.") R14-2-405.B.6 and A.A.C. R18-4-215.

REQUIREMENTS:

In compliance with the Rules of the Arizona Corporation Commission ("Commission") and the Arizona Department of Environmental Quality ("ADEQ"), specifically A.A.C. R14-2-405.B.6 and A.A.C. R18-4-215 relating to backflow prevention:

1. The Company may require a customer to pay for and to have installed a backflow-prevention assembly if A.A.C. R18-4-215.B or C applies.
2. A backflow-prevention assembly required to be installed by the customer under Paragraph 1 of this tariff shall comply with the requirements set forth in A.A.C. R18-4-215.D and E.
3. Subject to the provisions of A.A.C. R14-2-407 and 410, and in accordance with Paragraphs 1 and 7 of this tariff, the Company may terminate service or may deny service to a customer who fails to install a backflow-prevention assembly as required by this tariff.
4. The Company shall give any existing customer who is required to install a backflow-prevention assembly written notice of said requirement. If A.A.C. R14-2-410.B.1.a. is **not** applicable, the customer shall be given thirty (30) days from the time such written notice is received in which to comply with this notice. If the customer can show good cause as to why he cannot install the backflow-prevention assembly within thirty (30) days, the Company or Commission Staff may suspend this requirement for a reasonable period of time.

ADMINISTRATIVELY
APPROVED FOR FILING

5. Testing shall be in conformance with the requirements of A.A.C. R18-4-215.F. The Company may require the customer to pay to have the backflow-prevention assembly tested as long as the Company does not require an unreasonable number of tests.
6. The customer shall provide the Company with records of installation and testing. For each backflow-prevention assembly, these records shall include:
 - a. assembly identification number and description;
 - b. location;
 - c. date(s) of test(s);
 - d. description of repairs and recommendations for repairs made by tester; and
 - e. the tester's name and certificate number.
7. In the event the backflow-prevention assembly does not function properly or fails any test, and an obvious hazard as contemplated under A.A.C. R14-2-410.B.1.a. exists, the Company may terminate service immediately and without notice. The backflow-prevention assembly shall be repaired or replaced by the customer and retested.
8. In the event the backflow-prevention assembly does not function properly or fails any test, or in the event that a customer fails to comply with the testing requirement, and A.A.C. R14-2-410.B.1.a. is **not** applicable, the backflow-prevention assembly shall be repaired or replaced within fourteen (14) days of the initial discovery of the deficiency in the assembly or its function. Failure to remedy the deficiency or dysfunction of the assembly, or failure to retest, shall be grounds for termination of water service in accordance with A.A.C. R14-2-410.
